Boat House Lifts

RGC Advantage

RGC Boat House Lifts have been protecting boats from debris, rough water and damaging weather for over 60 years.

Installation is easy, requiring only basic hand tools, and operation requires just the turn of a switch. These lifts can be installed in new or existing boat houses.

Galvanized wire rope is reeved through a series of blocks and attached to an overhead power drive mounted to beams in the center of the boat house roof.

Features & Benefits

- Easily installed with basic hand tools.
- Plated brackets and hangers fit 6 in. wide beams.
- Electric power drive protected by G.F.C.I.
- Reversing switch returns to neutral and stops boat at desired height.
- Sealed gearbox.
- Adjusts to fit almost any boat's dimensions.

Boat House Lift with Adjustable Slings

Accessories

- **I-Beam Cradles** - Cradles provide full length support of boat hull and are ideally suited for choppy waters. *(Wood bunks are not included)*
- **Remote Control** - Kit consists of a control panel, remote transmitter and limit switch, which enables you to raise and lower your boat from up to 100 ft. away.
- **Nylon Slings** - Adjustable length slings conform to and support boat's hull. Sold in pairs of 2 in., 4 in. and 6 in. widths with lifting hardware and weights.
- **Blocks with Brass Bushings** - Carton of blocks with brass bushings for extended service life. Call the factory for details. 800-831-LIFT (5438)
